Slave BC Controller

R410A

At the heart of both the R2 and WR2 Series, the BC Controller makes simultaneous heating and cooling possible. It has the inherent 'intelligence' to be the system's decision-maker.

- **New brazed connections**
- **Transfers energy around the system, drawing on energy from the heat source units/outdoor units**
- **Directing energy as requested by the individual indoor units**
- **Instructs the heat source unit/outdoor unit on the amount of refrigerant (liquid or gas) that is required to achieve the requested cooling or heating requirements**
- **Allows unique 2-pipe heat recovery**
- **HIC Circuit for improved efficiency**
