## Air Conditioning

## Product Information AG-150 : 9" TOUCH SCREEN CONTROLLER

Our air conditioning systems are supported by a multitude of centralised controllers. Each centralised controller type, whilst being able to support the general control and monitoring functions for a group of indoor units, can also offer other unique operational features.

The AG150 is our most popular touch screen centralised controller. Using a large 9inch touch screen display allows a great user experience. The AG150 also has an Ethernet port to allow monitoring and control of your air conditioning via your PC and Webpages (no software required). The port also allows the AG150 to connect to a wide range of BEMS interfaces.

The AG150 requires a power supply (PAC-SC51KUA).
